

HOW TO TIE THE BELT

1. Fold the belt in half, with ends even.
2. Place center of belt on front center of jacket, about one inch below the naval. Wrap belt around your waist, crossing the right side over the left side at center of the back. Pull ends of belt forward and adjust so the ends are even.
3. Lay the right side of belt on top of the left side as shown.

4. Slide the (new) left side of belt under and behind all the belt layers at the front.
5. Loop.
6. Bring left end of belt down and over the front of the U.

7. Loop under and up through the U shape to form a knot.
8. Pull ends of belt outward to tighten knot.
9. Adjust so that the ends of the belt hang evenly.
